

## Low Profile MINI® Blade Fuses Rated 58V

The Low Profile MINI® fuse has similar performance characteristics as the standard MINI® fuse. The lower overall height allows for more space and weight savings. The Low Profile MINI® fuse is designed to mate with tuning-fork terminals, which provides additional weight and material savings in fuse box designs by eliminating the need for female box terminals.

### Specifications

Voltage Rating: 58 VDC  
 Interrupting Rating: 1000A @ 58 VDC  
 \*Component Level Temperature Range: -40°C to +125°C  
 \*\*System Level Temperature Range: -40°C to +105°C  
*105°C is a typical system level temperature requirement.*  
 Terminals: Ag plated zinc  
 Housing Material: PA66  
 Complies with: ISO 8820-9

Low Profile MINI® Blade Fuses

Low Profile MINI® 10.9mm Blade Fuses

### Dimensions

Dimensions in mm

### Low Profile MINI® 10.9mm

### Ordering Information

Part Number	Package Size	Plating
0891xxx.NXS	5000	Ag
0891xxx.U	500	Ag
0891xxx.H	100	Ag
<b>Low Profile MINI® 10.9mm Fuse</b>		
0891xxx.NXWS	5000	Ag

### Time-Current Characteristics

% of Rating	Opening Time Min / Max (s)
110	360,000 s / -
135	0.750 s / 120 s
200	0.150 s / 5 s
350	0.080 s / 0.250 s
600	0.030 s / 0.100 s

### Ratings

Part Number	Current Rating (A)	Housing Material Color	Cold Resistance (mΩ)	I²t (A²s)
0891002_†	2		54.2	3
0891005_	5	Orange	17.21	22
089107.5_	7.5	Brown	10.65	53
0891010_	10	Red	7.59	102
0891015_	15	Blue	4.70	198
0891020_	20	Yellow	3.35	420
0891025_	25	White	2.56	613
0891030_	30	Green	2.06	1110

† Only offered for the 10.0mm series.

### Time-Current Characteristic Curves

### Temperature Derating Curve

\*Component Level Temperature – the maximum ambient temperature that a single fuse will survive. This does not factor-in the heat from a populated fuse box, but does include the heat from the current load with the proper derating. \*\*System Level Temperature represents the ambient temperature of the fuse box at a location within the vehicle. The temperature within a populated fuse box (in a given location) will be higher. The limiting factor is the plating. Sn-plating's temperature limit is =130°C, and Ag-plating allows up to 150°C at the terminal interface.

Littelfuse products are not designed for, and shall not be used for, any purpose (including, without limitation, automotive, military, aerospace, medical, life-saving, life-sustaining or nuclear facility applications, devices intended for surgical implant into the body, or any other application in which the failure or lack of desired operation of the product may result in personal injury, death, or property damage) other than those expressly set forth in applicable Littelfuse product documentation.
