Series 19 Circuit Breakers

Waytek is now carrying the Mechanical Products Series 19 Circuit Breakers. These circuit breakers are designed for use in accessory or auxiliary direct circuit electrical systems to provide protection in the event of an overload and/or short circuit interruption. The Series 19 circuit breakers also provide superior corrosion, humidity, shock, and vibration protection in harsh applications.

FEATURES & BENEFITS

- Typical application areas include: heavy duty trucks, buses, marine, lift gates, off-road, electric vehicles, construction, military, mining, motorhomes, agriculture, and battery chargers
- Wide range in amperage choices available from 50A to 200A (25A - 45A breakers available via special order)
- Maximum voltage rating: 30 VDC
- Quick panel mount installation w/reset button access through panel
- New LED *tripID*™ technology available in certain models
- Ingress protections:
 - IP67 for dust and waterproofing
 - IP69K for high temperature and pressure spray
- Developed, designed, & manufactured in the U.S.A.
- MP Series 19 circuit breakers are a replacement for Klixon® S-Series thermal circuit breakers
