## GIGAVAC HBD SERIES Hermetic Battery Disconnects

Gigavac hermetically sealed battery disconnect switches are a first of their kind, providing a level of switching technology to meet a wide variety of application requirements. These manual disconnect switches incorporate important key features such as lock-out/tag-out to meet OSHA requirements, composite housings, and stainless steel hardware.

- Ideal for heavy truck, military, construction, material handling, RV, and off-road vehicles.
- Hermetic Battery Disconnects (HBD) can be mounted in virtually any environment including near vehicle batteries eliminating the need for extra cable length to place traditional switches inside the vehicle interior.
- Hermetic seal breakthrough patent pending technology
- Fiber composite housing and hermetic seal prevent corrosion inside and out.

Waytek # 200A | **77084**  
300A | **77080**

### FEATURES & BENEFITS

- Meets CE conformance standards - CE Approved
- HBD series sealed contacts ensures low voltage drop
- Lock out/tag-out meets OSHA requirements
- Available in 200A and 300A

- Max operating voltage: 1000 Vdc
- Ingress protection: IP 69
- Contact arrangement: SPST
- Operating temperature: -55°C to 85°C
