Sure Eject™ Automatic AC Disconnects

Blue Sea Systems Sure Eject™ series automatic AC disconnects feature a time saving automatic ejection system that is cost effective and protects your equipment. The Sure Eject™ charging system is ignition triggered so when the vehicle is turned on the power cord will automatically be disconnected, protecting your electrical system. The motorized design ensures that drivers will not drive away when they are still plugged in and provides a reliable disconnect in all conditions.

- Tested for years of operation
- Designed for one handed insertion for hard to reach places
- AC power indicating LED
- Compatible with existing 15A and 20A plugs
- Covers are interchangeable with Sure Eject™ body
- Standard mounting hole pattern for simple retrofit of existing designs
- Contoured cover prevents faulty ejections
